STAFF RECOMMENDATION

Staff recommends approval of this petition.

Plan Consistency

The petition is **inconsistent** with the *2040 Policy Map* recommendation for Manufacturing and Logistics Place Type.

Rationale for Recommendation

- While the petition is inconsistent with the *2040 Policy Map* recommendation for the Manufacturing and Logistics Place Type, the shift to Innovation Mixed-Use better aligns with neighboring development and the transition away from strictly industrial and business uses and zoning.
- The proposed IMU(CD) zoning supports the intent of the IMU district to encourage adaptive reuse projects in areas that may have been formerly dedicated to a singular development pattern that typically wouldn't support a residential product. The locale that the site sits in has long housed mostly a mix of office and commercial uses though has been zoned

as industrial and business districts. The larger area is shifting to a greater mix of zoning districts that can accommodate commercial, office, and residential uses compatible with this rezoning.

- The site is within a ½ mile from CATS number 56 and 57 local bus stop providing transit access between the LYNX Blue line Arrowood Station and the Charlotte Premium outlets mall as well as to the SouthPark Community Transit Center.
- The commercial and office uses in the area may provide access to goods and services as well as employment opportunities for future residents at this site.

The approval of this petition will revise the recommended place type as specified by the *2040 Policy Map*, from the Manufacturing and Logistics Place Type to the Innovation Mixed Use Place Type for the site.

- **Public Plans and Policies**

- **TRANSPORTATION SUMMARY**

- The site is located adjacent to Forest Point Boulevard, a City-maintained local street, south of West Arrowood Road, a City-maintained major arterial. A Traffic Impact Study (TIS) is not required for the site due to the development generating site trips under ordinance thresholds and not meeting additional TIS triggers. The site will be subject to transportation improvements in accordance with the UDO and the adopted CDOT Streets Map. CDOT will work with the petitioner during the permitting process to pursue all options to provide additional forms of connectivity that reflect the types of development associated with this place type and zoning district.
