**STAFF
RECOMMENDATION**

Staff recommends approval of this petition.

Plan Consistency

The petition is **inconsistent** with the office/retail/light industrial adopted future land use for this site, as per the *Westside Strategic Plan*.

Rationale for Recommendation

- The proposed I-2 (CD) general industrial zoning for this parcel, while inconsistent with the light industrial recommendation for the site, is compatible with the industrial developments in the area.
- The conditional use allows for outdoor storage of equipment and material to allow for a manufacturing use which is compatible with the industrial developments in the area.

- The site is located within the Shopton Road Industrial Activity Center, as per the *Centers Corridors and Wedges Growth Framework*.
- The petition commits to transportation improvements along Shopton Road including a left turn lane into the site, a 5' bicycle lane, 8' planting strip, and 6' sidewalk.
- The proposed industrial uses will be screened from adjacent residential zoning and uses by a minimum 75' buffer with a berm.

The approval of this petition will revise the adopted future land use as specified by the *Westside Strategic Plan*, from office/retail/light industrial land use to heavy industrial use for the site.
