A minimum sixty (60) foot setback will be provided along Shamrock Drive as, per the Ordinance, measured from the existing/future back of curb. Within the setback area of Shamrock Drive, an eight (8) foot planting strip and a ten (10) foot sidewalk will be provided.
- b. **Willard Farrow.** An eight (8) foot planting strip and a six (6) foot sidewalk will be provided along Willard Farrow Drive along the frontage(s) of Development Area(s) 1 and 2 as development occurs within each respective Development Area.
- c. **Side Yard Setback/Buffer Areas.** Buffers will be provided as follows:
 - i. A 50' Class 'C' Buffer shall be provided along the eastern property line within Development Area 1 abutting the adjacent existing R-3 residential lots. The Class 'C' Buffer requirements shall be amended to include the existing trees provided that they comply with the buffer requirements, per final review with Urban Forestry.
 - ii. A 50' Class 'C' Buffer shall be provided along the southern, western and eastern property line within Development Area 4 abutting the adjacent existing R-3 residential lots. The Class 'C' Buffer requirements shall be amended to include the existing trees provided that they comply with the buffer requirements, per final review with Urban Forestry.

6. **Pedestrian Access and Circulation Design Guidelines:**

- a. Along the Site's internal private driveways, the Petitioner will provide a sidewalk and a cross-walk network that links the buildings, parking areas and areas of interest on the Site with one another by way of links to sidewalks along the abutting public and/or other pedestrian features as generally depicted on the Rezoning Plan. The minimum width for these internal sidewalks will be six (6) feet.
- b. Walkways through plazas or publicly accessible open space areas will be appropriately designed for the intended use and type of open space area in which they are located.
- c. Where walkways occur along building walls, a walkway width of at least six (6) feet must be maintained clear of door swings, temporary trash or similar impediments.
- d. In an effort to minimize conflicts with pedestrians, bicyclists, and motorists, all new dumpster and recycling areas shall be placed outside of pedestrian and driveway access areas.
- e. Internal private streets will have a minimum six (6) foot sidewalk along the proposed development frontage. In some instances, sidewalks may only be provided along one side of the street.

7. **Open Space Generally:**

- a. The Petitioner will provide open space areas in the manner generally depicted on the Rezoning Plan but subject to minor adjustments needed to accommodate building and parking improvements. Open space areas will contain landscaping, seating areas and/or hardscape elements.
- b. A minimum of 3,500 square feet per development area of common usable open space shall be provided in Development Areas 1, 2, 3, and 4. The common usable open space shall include landscaping, hardscape, benches, seating areas or other similar features.

8. **General Design Guidelines:**

- a. **Building Placement and Site Design.** Building Placement and Site Design shall focus on and enhance the pedestrian environment through the following:
 - i. Buildings shall be placed so as to present a front or side facade to the existing public streets.
 - ii. Buildings shall front a minimum of 60% of the total public street frontage on the Site (exclusive of driveways, pedestrian access, points, accessible open space, tree save or natural areas, tree replanting areas and storm water facilities).
- b. **Building Massing and Height.** Building Massing and Height shall be designed to break up long monolithic building forms as follows:
 - i. Buildings exceeding 120 feet in length shall include modulations of the building massing/facade plane (such as recesses, projections, and architectural details). Modulations shall be a minimum of 10 feet wide and shall project or recess a minimum of 4 feet extending through the building.
 - ii. The maximum buildings heights shall be permitted as follows:
 - (a.) Development Area 1: a maximum building height of seventy-five (75) feet shall be permitted except that no building shall be taller than sixty (60) feet within 100' from the eastern property boundary as generally depicted on the Rezoning Plan.
 - (b.) Development Area 2 and 3: a maximum building height of sixty-five (65) feet shall be permitted.
 - (c.) Development Area 4: a maximum building height of forty (40) feet shall be permitted.
- c. **Architectural Elevation Design.** Elevations shall be designed to create visual interest as follows:
 - i. Building elevations shall be designed with vertical bays or articulated architectural facade features which may include but not be limited to a combination of exterior wall offsets, projections, recesses, pilasters, banding and change in materials or colors.
 - ii. Buildings four stories and greater shall be designed with a recognizable architectural base on all facades facing the existing public streets. Such base may be executed through use of the allowed building materials or articulated architectural facade features and color changes.
 - iii. Building elevations facing the existing public streets shall not have expanses of blank walls greater than 20 feet in all directions and architectural features such as but not limited to banding, medallions or design features or materials will be provided to avoid a sterile, unarticulated blank treatment of such walls.
- d. **Mixed-Use and Non-Residential Building Standards in Development Area 2.** In addition to the standards set forth above, the following standards shall apply to mixed-use and non-residential buildings:
 - i. Architectural treatment shall continue on all sides of a building except as specifically noted otherwise.
 - ii. Ground floor elevations shall be treated with a combination of fenestration, clear glass, prominent entrances, change in materials, building step backs, artwork and landscaping. Blank walls greater than twenty feet (20') cannot be addressed with landscape elements only.
 - iii. Accessory structures shall be consistent with the principal building in material, texture, and color.
 - iv. Facades fronting public streets shall include a combination of windows and operable doors for a minimum of 40% of each frontage elevation transparent glass between 2' and 10' on the first floor. Up to 20% of this requirement may be comprised of display windows. These display windows must maintain a minimum of 3' clear depth between window and rear wall. Windows within the zone shall not be screened by film, decals, and other opaque material, glazing finished or window treatments. The maximum sill height for required transparency shall not exceed 4' above the adjacent street sidewalk.
 - v. Direct pedestrian connections should be provided between street facing doors, corner entrance features to sidewalks on adjacent streets.
- e. **Residential Buildings.** In addition to the standards set forth above, the following standards shall apply to residential buildings:

The building materials used for buildings will be a combination of the following: glass, brick, stone, simulated stone, pre-cast stone, precast concrete, synthetic stone, stucco, cementitious siding (such as hardy-plank), EIFS, metal or wood. Vinyl as a building material will not be allowed except on windows, soffits and on handrails/railings.
 - ii. Accessory structures shall be consistent with the principal building in material, texture, and color.
- f. **Screening and Mechanical Treatment.** The following shall apply to HVAC, dumpster, refuse, and storage areas:
 - i. All roof mounted mechanical equipment on the new buildings to be constructed on the Site will be screened from view from adjoining public rights-of-way and abutting properties as viewed from grade.
 - ii. New dumpster and recycling areas will be enclosed on all four sides by an opaque wall or fence with one side being a hinged opaque gate. If one or more sides of a new dumpster and recycling area adjoin a side wall or rear wall of a building, then the side wall or rear wall of the building may be substituted for the wall or fence along each such side. New dumpster and recycling areas will be enclosed on all four sides by an opaque wall or fence with one side being a hinged opaque gate. If one or more des of a new dumpster and recycling area adjoin a side wall or rear wall of a building, then the side wall or rear wall of the building may be substituted for the wall or fence along each such side. No dumpster or recycling areas will be located along the Museum of History edge.

- iii. HVAC condensers shall be screened from view from adjoining public rights-of-way and abutting properties.
- iv. To minimize conflicts with pedestrians, bicyclists and motorists, all new dumpster and recycling areas shall be placed outside of pedestrian and driveway access areas.

In addition, uses located on the interior of the Site may be identified on the allowed signs (by way of example, the residential uses and the other uses may be identified on the signs allowed along Shamrock Drive). The allowed signs may contain identification signage for any of the permitted uses located on the Site.
- c. Master signage and graphic systems may be adopted.

11. **Lighting:**
