STAFF RECOMMENDATION

Staff recommends approval of this petition.

Plan Consistency

The petition is **inconsistent** with the *Central District Plan* (1993) recommendation for single family residential uses up to 4 dwelling units per acre (DUA). The petition is **consistent** with the General Development Policies which supports up to 8 DUA for the site.

Rationale for Recommendation

- The petition would not allow any greater height allowance permitted under the existing zoning district (40 feet for a residential structure).
- This request supports the *Central District Plan's* policy recommendation of promoting "more urban scale infill development..." while only modestly increasing the allowable density on the site from one unit to two units.
- The subject site is the northern most parcel zoned R-5 on the western side of Glenwood Drive and adjacent to a number of parcels

zoned O-2, making it an appropriate site to transition to slightly denser uses.

- Though this site is in the airport noise overlay, it is near the northern edge of the overlay, around three miles from the edge of the airport; and a small increase in density to the site provides appropriate infill without drastically increasing the overall residential units within the airport noise overlay.

The approval of this petition will revise the adopted future land use as specified by the *Central District Plan* (1993), from single family residential uses up to 4 DUA to multi-family residential uses up to 8 DUA.

- South of the site are single family houses.

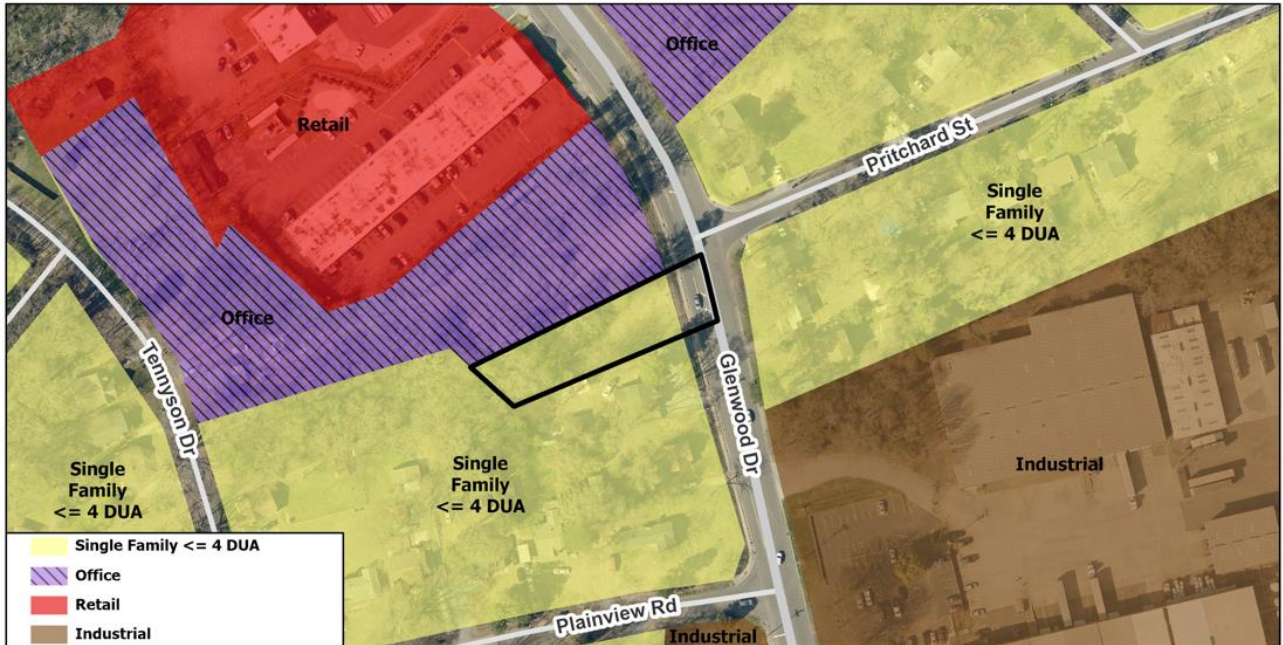

- West of the site are some vacant parcels and single family houses.
