Staff recommends approval of this petition.

Plan Consistency

The petition is **consistent** with the Regional Activity Center recommendation of the 2040 Policy Map (2022).

Rationale for Recommendation

- The proposed single family attached development is consistent with the regional activity center recommendation, which is characterized by its urban form and mix of uses.
- The proposed development is compatible with the mixed-use developments in the area which is transitioning from industrial use to mixed use.

- The proposed site plan provides fencing and vegetative screening between the residential development and existing industrial uses.
- The petition would provide “missing middle” housing in a growing mixed-use area surrounding the NC Music Factory entertainment complex.

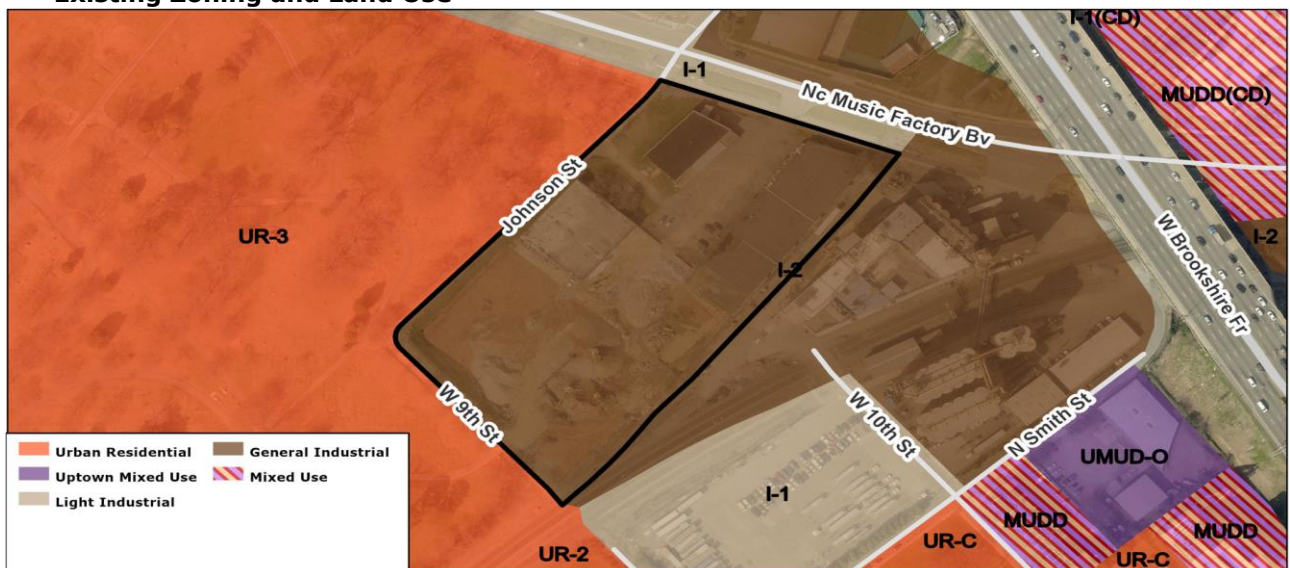

PLANNING STAFF REVIEW

• Proposed Request Details

The site plan accompanying this petition contains the following provisions:

- Proposes redevelopment of the site with 7,500 square feet of non-residential uses and 82 77 single family attached dwelling units.
- The 7,500 square feet of non-residential uses would be in adaptively reusing the building at the intersection of NC Music Factory Boulevard & Johnson Street. All MUDD uses would be allowed with the exception of the following prohibited uses: gas station, car wash, self-storage building, or accessory vehicular drive-through window. In the event that the building cannot be preserved, reserves the option to add an additional 14 townhome units in its place for a total of 96 dwelling units.
- Requests an optional provision to deviate from the typical streetscape standards along NC Music Factory Boulevard to eliminate the sidewalk due to site constraints caused by the existing railroad right of way.
- Limits building height to 55’.
- Proposes to abandon the right of way of both Johnson Street and W Ninth Street. A public easement would be provided, and the streets would be used as pedestrian and bicycle facilities. If the abandonment is not approved, the petitioner is required to install the code required curb and streetscape facilities.
- Vehicular access to the cemetery would be maintained.
- Commits to use of preferred building materials of brick, natural stone, stucco, cementitious siding, fiber cement, and metal.
- Limits the number of dwelling units per building to six.
- Commits to providing a minimum 6’ tall aluminum fence and 10’ wide landscape buffer area where feasible where feasible on the south side of the development.
- Commits to providing amenity areas with a minimum of two of the following elements: benches, public art, sculptures, enhanced landscaping, garden area, dog park, picnic table, workout equipment, and/or passive recreation.
- Provides an open space area in the northeastern corner of the site closest to the adjacent mill structure.
- Commits to enhancements associated with the Urban Arboretum Trail or a donation of \$15,000 to the city in lieu of those enhancements.
