# Committee Discussion Topics for Consideration

- ◀ **We need to allow our infrastructure investments to catch up with where our growth is today, and to guide where future growth is appropriate.**
- ◀ **What are the biggest infrastructure challenges from the HSC committee's policy-specific perspective?**
- ◀ **What do we define as major components and drivers of infrastructure investment within the HSC committee's policy concentrations?**
  - What metrics do we use to measure these components and drivers?
  - What, very specific, policy approaches might we take to address these components, drivers, and investments?
- ◀ **Are we able to map/visualize both areas that face infrastructure challenges & growth / development trends in order to compare the two?**
- ◀ **Language that will guide staff to bring Council a road map for future policy work around these metrics.**
