STAFF
RECOMMENDATION

Staff recommends approval of this petition.

Plan Consistency

The petition is consistent with the *Eastland Area Plan*, which reflects the office use per previous rezoning 1999-032.

Rationale for Recommendation

- The proposed request allows the expansion of an existing office located in a dwelling converted for office use.
- The site's location between business and multi-family residential districts makes the proposed O-1(CD) (office, conditional) district an acceptable land use and zoning transition.
- The proposed 16-foot planting strip will preserve space for a future proposed buffered bike lane.

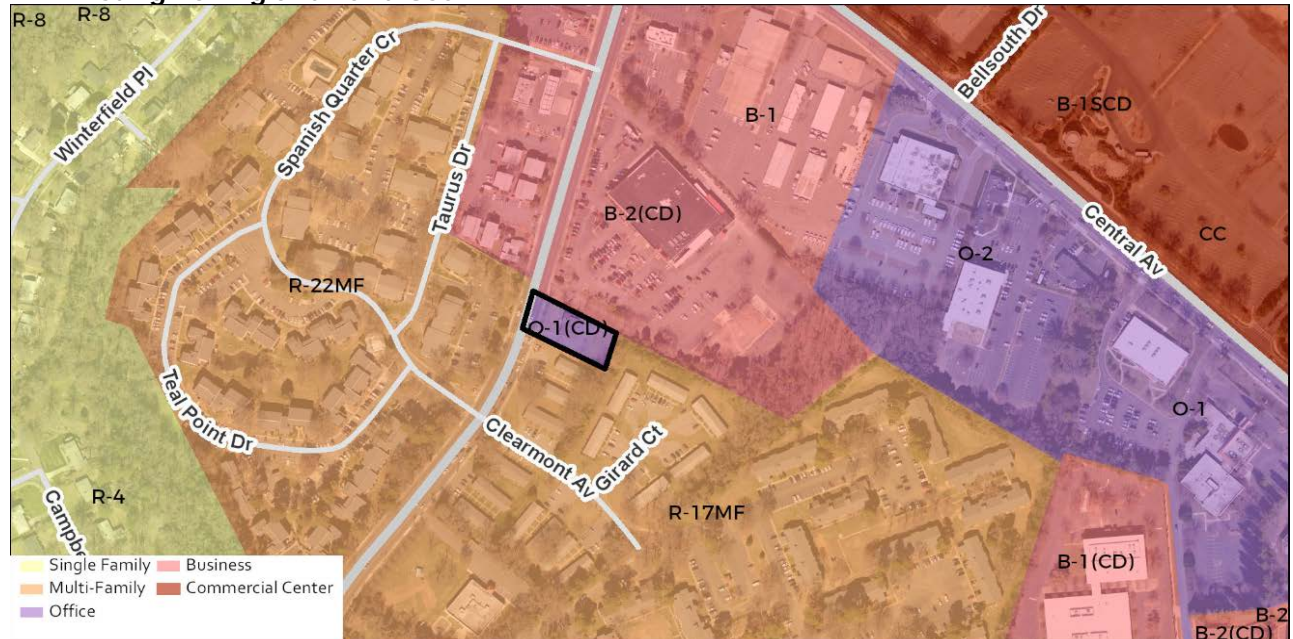

PLANNING STAFF REVIEW

• Proposed Request Details

The site plan amendment contains the following changes:

- Building square footage increased from 1,248 to 4,200 square feet via replacement of the existing building with a new structure.
- Permitted uses include all uses permitted in the O-1 (office) district, instead of being only general office uses.
- Setback reduced from 30 feet to 20 feet, which is the required setback in the proposed district.
- Providing a 16-foot wide planting strip and six-foot sidewalk along project frontage on North Sharon Amity Road.
- Increases width of Class C buffer from the required setback to the rear property line from 7.6 feet to 10 feet along the southern property line, and provides a minimum six-foot tall fence around the entire perimeter.

• Existing Zoning and Land Use

- Petition 1999-32 rezoned the subject property to O-1(CD) (office, conditional) to permit the conversion of a single family residential house to a 1,248 square foot building for general office uses.
- The subject property is developed with an office use within a former single family structure.
- Surrounding properties are developed with office, retail, and multi-family residential uses in office, business and multi-family residential zoning districts.

The subject property is developed with an office use.

Properties to the north are developed with a mix of retail and office uses.

Properties to the south and east are developed with multi-family dwellings.

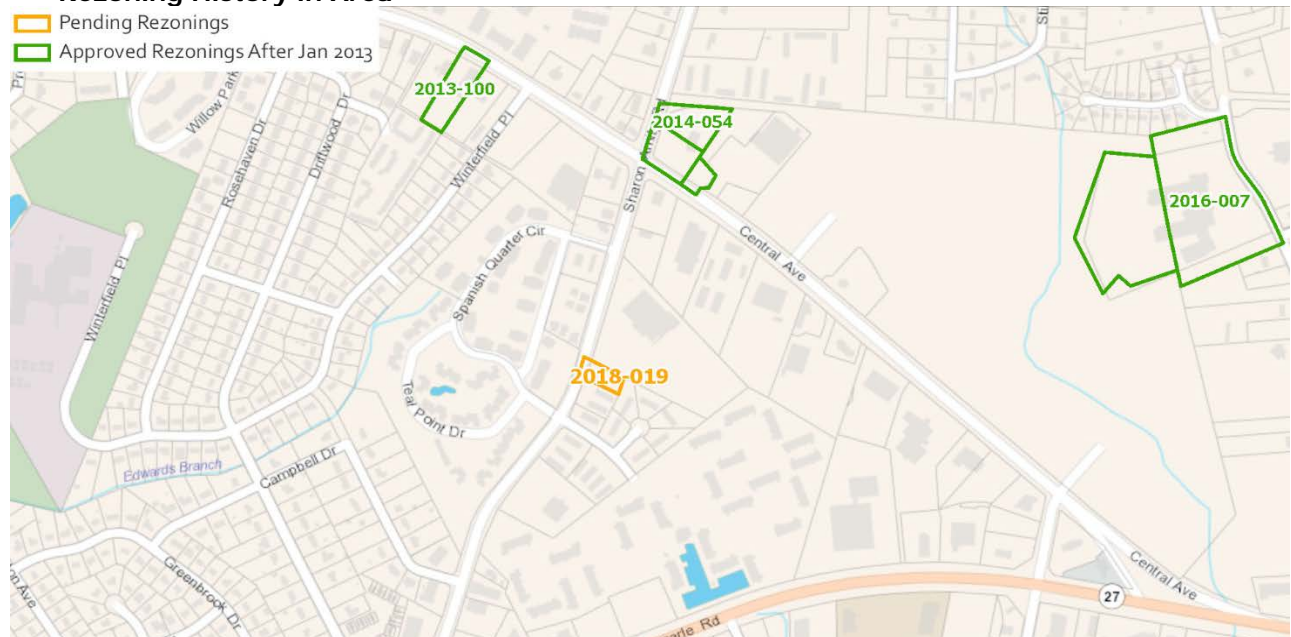

Properties to the west are developed with multi-family dwellings.
