**ZONING COMMITTEE
ACTION/ STATEMENT
OF CONSISTENCY**

The Zoning Committee voted 7-0 to recommend APPROVAL of this petition and adopt the consistency statement as follows:

This petition is found to be consistent with the *Blue Line Extension Transit Station Area Plan*, based on the information from the staff analysis and the public hearing and because:

- The plan recommends transit oriented development – mixed use for the site.

Therefore, we find this petition to be reasonable and in the public interest based on information from the staff analysis and the public hearing and because:

- The site is within a ¼ mile walk distance from the Parkwood Transit Station, and is included in a larger area envisioned to be redeveloped with transit supportive development; and
- The proposed transit oriented development zoning is more consistent with the vision for the area than the current industrial zoning; and
- The new development will contribute toward the goal of providing a compatible mix of transit supportive uses within the transit station area; and
- The project will enhance the pedestrian environment along the public street frontages by installing new sidewalks and planting strips along public street frontages, and providing building entrances that connect directly to the public sidewalks; and
- This proposed request provides an opportunity for a non-residential use near several new and proposed multi-family residences; and
- Building height limited to 40 feet is consistent with and sensitive to the surrounding neighborhoods.
