**STAFF
RECOMMENDATION**

Staff recommends approval of this petition.

Plan Consistency

The petition is **inconsistent** with the *Central District Plan* land use recommendation for single family up to 4 DUA for this site.

Rationale for Recommendation

- The proposed petition is inconsistent with the land use recommendation for single family up to 4 DUA for this site. However, the site is located at an intersection within an activity center that could support a small increase in density.
- The site is currently developed as a duplex which is permitted on corner lots within the R-4 zoning district.
- The petition meets the General Development Policies locational criteria for consideration of up to 6 dwellings per acre.

The approval of this petition will revise the adopted future land use as specified by the *Central District Plan*, from single family up to 4 DUA, to residential up to 8 DUA for the site.

PLANNING STAFF REVIEW

- **Proposed Request Details**

This is a conventional rezoning petition with no associated site plan.

- **Existing Zoning and Land Use**

The subject property is developed with a duplex house. The adjacent land uses include vacant land, single family homes, and the Charlotte-Douglas Airport.

The subject property is developed with a duplex.

The property to the north is a parking lot for Charlotte-Douglas Airport.

The property to the west is a single family house.

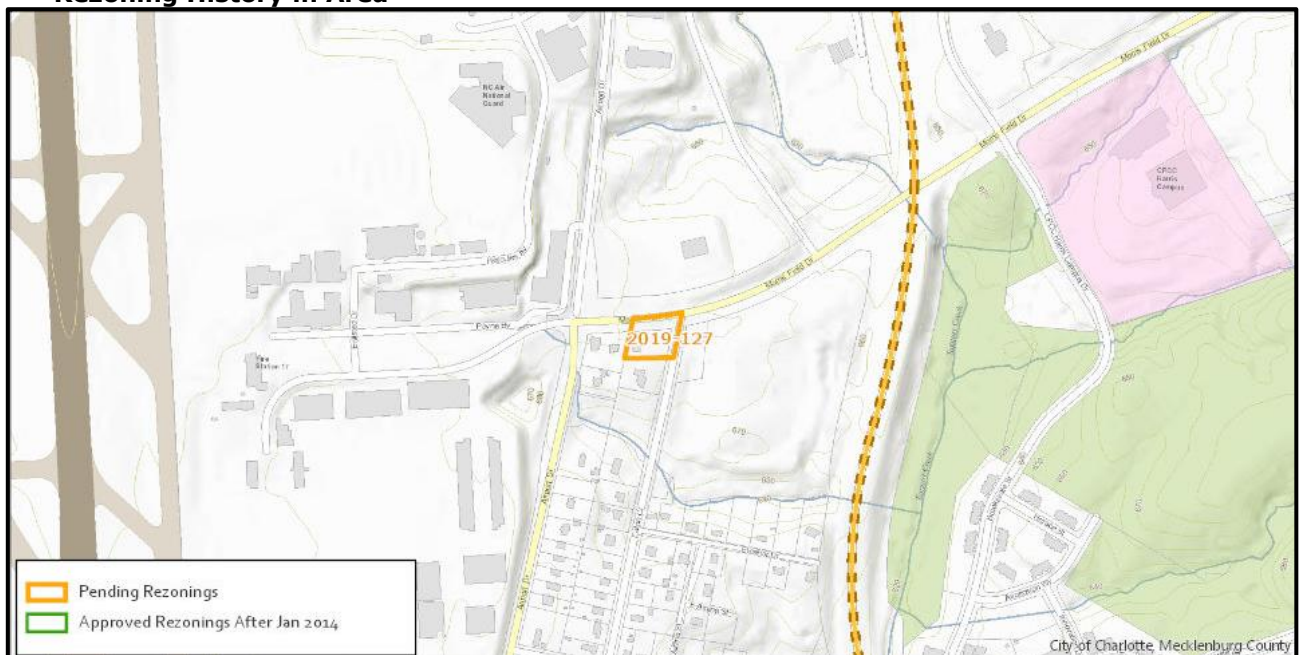

The property to the east of the site is undeveloped vacant land.

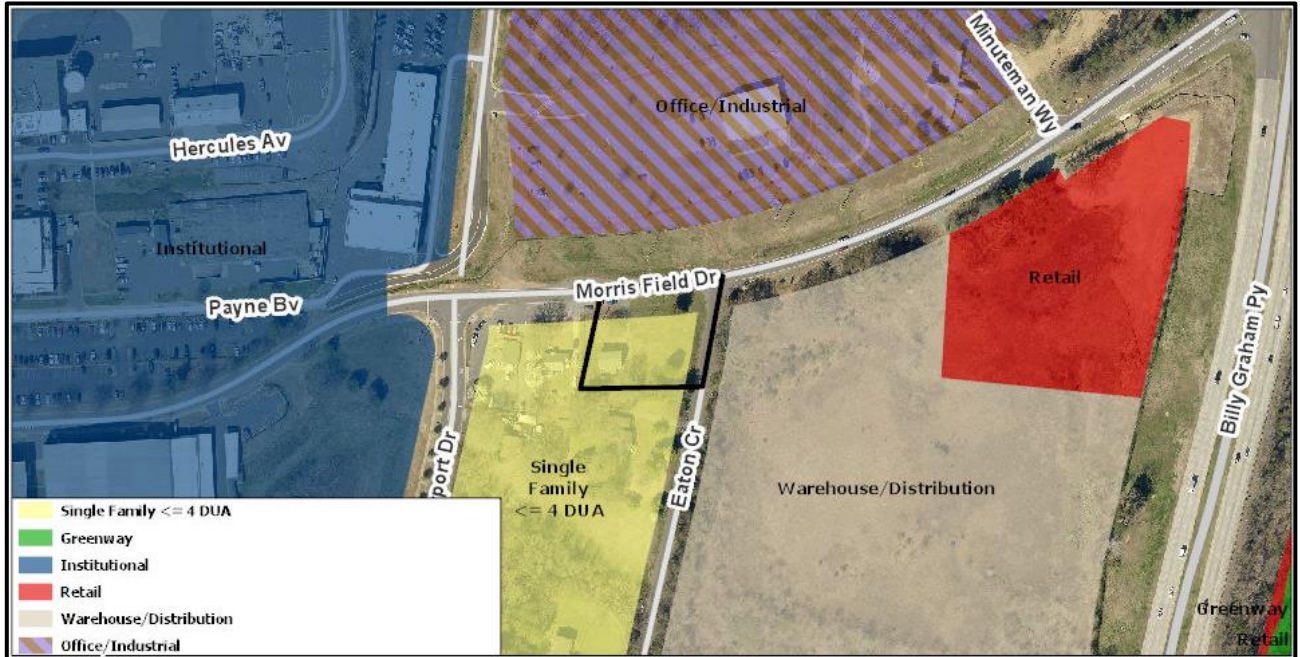

The property to the south of the site is a single family house.

- **Rezoning History in Area**

There are no recent rezonings within the surrounding area.

- **Public Plans and Policies**

- The *Central District Plan* (1993) recommends single family up to 4 dua for this site.
- The *General Development Policies* (GDP) provides policy guidance for evaluating proposed residential densities greater than four units per acre. The petition meets the General Development Policies locational criteria for consideration of up to 6 dwellings per acre as illustrated in the table below.

Assessment Criteria	Density Category – up to 6 dua
Meeting with Staff	1
Sewer and Water Availability	2
Land Use Accessibility	1
Connectivity Analysis	2
Road Network Evaluation	0
Design Guidelines	4
Other Opportunities or Constraints	NA
Minimum Points Needed: 10	Total Points: 10

- **TRANSPORTATION CONSIDERATIONS**

- The site is at the unsignalized intersection of Morris Field Drive (major collector, city maintained) and Eaton Drive (local, city maintained). The site is in a center outside of Route 4.
- No outstanding issues.
- **Vehicle Trip Generation:**
 - Current Zoning:
 - Existing Use: 20 trips per day (based on 2 dwellings).
 - Entitlement: 30 trips per day (based on 0.85 acres of R-4).
 - Proposed Zoning: 60 trips per day (based on 0.85 acres of R-8MF).

DEPARTMENT COMMENTS (see full department reports online)

- **Charlotte Area Transit System:** See advisory comments at www.rezoning.org
- **Charlotte Department of Housing and Neighborhood Services:** No comments submitted.
- **Charlotte Fire Department:** See advisory comments at www.rezoning.org
- **Charlotte-Mecklenburg Schools:** The development allowed under the existing zoning could generate 2 students, while the development allowed under the proposed zoning may produce 3 students. Therefore, the net increase in the number of students generated from existing zoning to proposed is 1 additional student.
 - The proposed development is not projected to increase the school utilization over existing conditions (without mobile classroom units) as follows:
 - Renaissance West K-6 at 74% (remains the same)
 - West Mecklenburg High at 83% (remains the same).

- **Charlotte Water:** Charlotte Water has accessible water system infrastructure for the rezoning boundary via an existing 6-inch water distribution main located along Eaton Circle and via an existing 12-inch water distribution main located along Morris Field Drive. Charlotte Water has sanitary sewer system infrastructure accessible for the rezoning boundary via an existing 8-inch gravity sewer main located along Eaton Circle and via an existing 8-inch gravity sewer main located along Morris Field Drive.
