STAFF
RECOMMENDATION

Staff recommends approval of this petition.

Plan Consistency

The petition is **consistent** with the *Elizabeth Area Plan (2011)* recommendation for residential up to 22 dwelling units per acre.

Rationale for Recommendation

- The density of the proposed project is 7.41 units per acre, which is substantially less than the adopted plan recommendation for up to 22 units per acre.
- The proposal will not result in a decrease in the number of residential units.
- The building design requirements will help provide compatibility with the surrounding neighborhood.

- The request will not result in an increase in the number of vehicular trips.

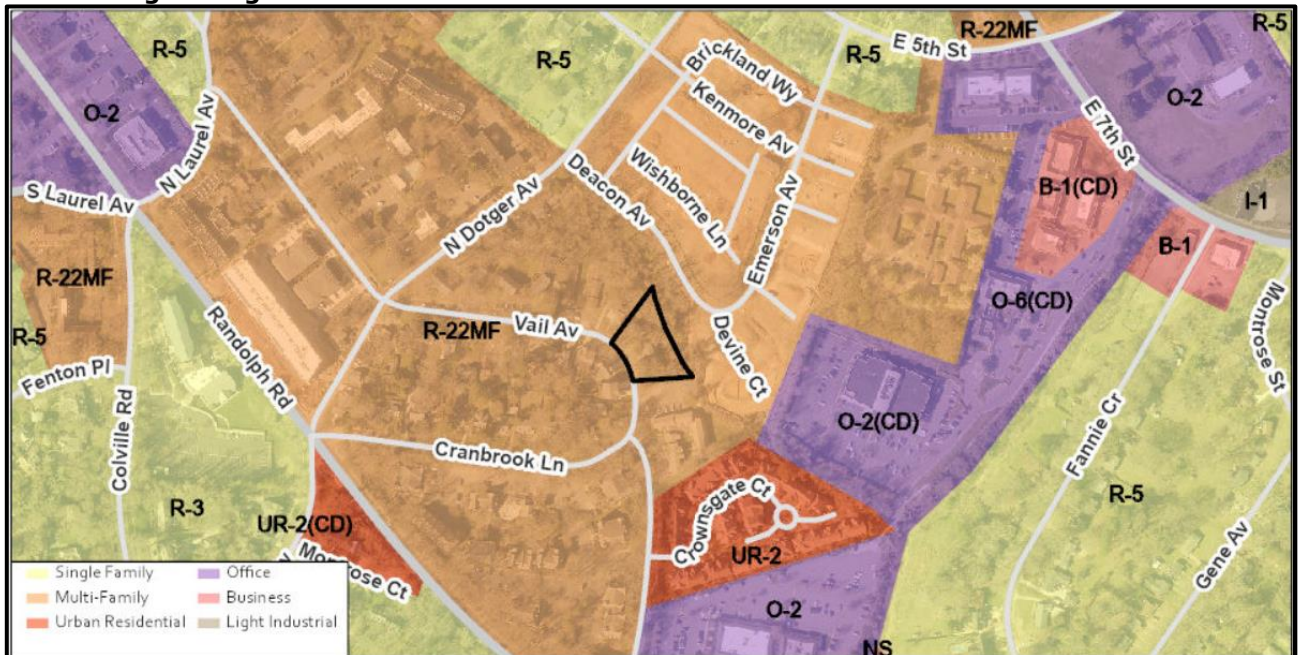

PLANNING STAFF REVIEW

- **Proposed Request Details**

The site plan accompanying this petition contains the following provisions:

- Allows 2 buildings containing a maximum of 2 units in each at a density of 7.41 dwelling units per acre.
- A 14-foot setback along Vail Avenue.
- Driveway access points from Vail Avenue.

- Building materials to be used will be a combination of portions of the following: glass, brick, stone, simulated stone, precast stone, precast concrete, synthetic stone, cementitious siding, vinyl, EIFS, stucco, or wood. Vinyl material may only be used on trim or windows, but not on exterior siding.
- Limits blank wall expanse to 15 feet.
- Each residential unit will have a 2-car garage.
- Garage doors visible from Vail Avenue will minimize visual impact by providing a setback of 8 inches to 12 inches from the front wall plane or provide additional architectural treatments such as translucent windows, enhanced door, or projecting elements over the garage door opening.
- Identifies 35-foot SWIM and Post Construction Buffer in the rear yards.
