Plan Consistency

The petition is **consistent** with the *University Research Park Area Plan (2010)* recommendation of Residential/Office/Retail.

Rationale for Recommendation

- The subject site is located on IBM drive and West WT Harris Boulevard and proposes up to 300 multi-family residential dwelling units, with a density of 10.72 dwelling units per acre (DUA).
- This proposed use and density is appropriate for the *University Research Park Area Plan's* recommendation of residential/office/retail for this site, with a density of up to 22+ units per acre.

- The addition of multi-family uses in this area will increase the mix of uses in the University Research Park area.
- The petition proposes an open space area improved with landscaping, seating areas, hardscape elements and shade structures as applicable and appropriate to the proposed amenity area.
- The petition's orientation towards IBM drive and commitment to a 12-foot multi-use path and an 8-foot planting strip increases the walkability of the area.
- The Petitioner commits to conveying to Mecklenburg County for the development of a greenway the portion of 100-foot SWIM buffer associated with Doby Creek and the east/west tributary stream that runs parallel to W. T. Harris toward IBM Drive located on the Site. This area will be dedicated and conveyed to Mecklenburg County prior to the issuance of the first certificate of occupancy for the Site.
