**STAFF  
RECOMMENDATION**

Staff recommends approval of this petition.

Plan Consistency

The petition is **inconsistent** with the *Belmont Area Revitalization Plan's* (2003) recommendation for greenway uses for the site.

Rationale for Recommendation

- Prior requests for urban residential zoning districts have been approved near the existing request and are found throughout the Belmont and Optimist Park neighborhoods. The location is near transit and accommodates a moderate increase in residential density.
- Since the Little Sugar Creek Greenway was constructed after the plan was adopted, the greenway is now located east of this site and the land use designation could be changed to a compatible use.

- The requested density (23.5 DUA) is near the entitled density found in the current R-22MF district.
- The request for an increase in density is reasonable in that the parcel is proximal (around 2,800 feet) to the Blue Line's Parkwood Avenue Station.
- Additionally, the request provides new housing that brings added density along the Little Sugar Creek Greenway.

The approval of this petition will revise the adopted future land use as specified by the *Belmont Area Revitalization Plan*, from greenway uses to residential uses over 22 DUA for the site.

### PLANNING STAFF REVIEW

- **Proposed Request Details**

The site plan accompanying this petition contains the following provisions:

- Up to four (4) single family attached dwelling units at a max. height of 40 feet.
- Commits to improving N. Alexander Street and 15<sup>th</sup> Street with curb and gutter and include an 8-foot wide planting strip and 6-foot wide sidewalk along both frontages.
- Access to the units is provided by two shared driveways.

- **Existing Zoning and Land Use**

There have been no historical rezonings of this site. The area is largely zoned multi-family residential SE of N. Alexander Street and a mixture of TOD and industrial zoning is found NW of N. Alexander Street.
