Sole Source Exemption

- NC General Statute Section 143-129(e)(6) provides that formal bidding requirements do not apply when:
 - Performance or price competition are not available.
 - A needed product is available from only one source or supply; or
 - Standardization or compatibility is the overriding consideration.
- Sole sourcing is necessary for this contract because the needed products are available from only one source or supply.
- City Council approval is required for any purchases made under the sole source exception.

Explanation

- The City of Charlotte was awarded a matching grant from the Clean Fuel Advanced Technology Project in 2019 and funding was used to purchase four solar-powered electric vehicle chargers (EV Arcs).
- The EV Arcs provide 100 percent solar powered electricity, helping move Charlotte closer to 100 percent zero-carbon fuel sources by 2030 as outlined in the Strategic Energy Action Plan.
- The city-owned EV Arcs have been moved from various locations to support off-the-grid public charging, including the Corridors of Opportunity geographies.
- This contract will be used for the purchase of transport equipment to more efficiently and safely

transport EV Arc chargers.

- This contract can also be used for future purchases of EV Arcs.
- Total annual expenditures are estimated to be \$250,000.

Charlotte Business INclusion

This is a sole source contract and is exempt (Part A: Appendix 1.27 of the Charlotte Business INclusion Policy).

Fiscal Note

Funding: General Capital Investment Plan
