**Explanation**

- City vehicles and equipment are assessed on an annual basis to determine replacement needs based on a rating of vehicle usage, age, maintenance costs, and condition.
- Vehicles and equipment being purchased include light-duty hybrid SUVs and electric sedans, heavy duty cab and chassis, street maintenance equipment, sewer cleaning equipment, mini excavators, skid steers, utility vehicles, forklifts, and heavy-duty construction equipment.
- G.S. 143-129(e)(3) allows local governments to purchase from formally organized cooperative purchasing contracts.
- A cooperative purchasing agreement results from the consolidation and competitive solicitation of multiple public agency requirements. By aggregating common needs, all agencies can leverage economies of scale, such as volume discounts; improved terms and conditions; reduced

administrative costs; and access to professional and technical expertise that can be used on a local, regional, and national level.

- Total annual expenditures are estimated to be \$3,550,000.

**Charlotte Business INclusion**

These are cooperative purchasing contracts and are exempt (Part A: Appendix 27 of the Charlotte Business INclusion Policy).
