Jonathan Webster, Innovation and Technology

Explanation

- The City's enterprise backup system is key to enabling the City's data protection, business continuity, and disaster recovery strategies.
- On December 9, 2019, City Council approved competitively-solicited unit price contracts with various vendors, including SHI International Corp, for technology products and associated services for an initial term of three years with two optional one-year renewals.
- This action approves the use of American Rescue Plan Act (ARPA) funds for the enterprise backup system project through an existing unit price contract with SHI International Corp.
- The current enterprise backup system was acquired three years ago via a five-year "Flex-on-demand" subscription expiring in 2023.
- The City needs to identify, purchase, and implement a new enterprise backup solution at least six to twelve months before the current subscription expires to allow time to implement and transition to the new system.
- ARPA funding approved for this purchase supports the transition to the new system.
- The updates to the City's technology infrastructure will support the City's pandemic operational needs with telework as a means of mitigating and preventing the spread of COVID-19.
- Total ARPA expenditures are estimated to be \$512,000.

Charlotte Business INclusion

Per Charlotte Business INclusion Policy: Part C: Section 2.1(a) The City shall not establish Subcontracting Goals for Contracts where: (a) there are not subcontracting opportunities identified for the Contract; or (b) there are no SBEs or MBEs certified to perform the scopes of work that the City regards as realistic opportunities for subcontracting.

This contract meets the provisions of (a) - No subcontracting opportunities.
