- B. Authorize the City Manager to approve possible price adjustments and amend the contract consistent with the purpose for which the contract was approved.**

Staff Resource(s):

Mike Davis, Engineering and Property Management
Matthew Gustis, Engineering and Property Management

Explanation

- Storm Water Services begins new storm drainage improvement projects that are the highest ranking in the program each year.
- The projects may include storm drainage improvements that reduce house and street flooding, repair failing infrastructure or enhance water quality of nearby creeks.
- Work will include, but is not limited to:
 - Evaluation,
 - Analysis and recommendations for repair and/or improvement,
 - Design of repairs and/or improvements,
 - Preparation of construction documents,
 - Environmental assessments, and
 - Construction oversight and monitoring.
- On July 13, 2016, the City issued a Request for Qualifications titled "Unspecified Storm Drainage Improvement Services"; 25 proposals were received from interested professional service providers.
- These firms are the best qualified to meet the City's needs on the basis of demonstrated competence and qualification of professional services in response to the RFQ requirements.
- When consultants perform quality engineering analysis, the most efficient method is for that firm to complete the design and provide construction administration services.
- Estimated expenditures for the five contracts are \$2,050,000 over the three-year term.

Charlotte Business INclusion

The City negotiates subcontracting participation after the proposal selection process (Part C: Section 2.1 (h) of the Charlotte Business INclusion Policy). On these contracts, the Prime Consultants have each committed 10% of the total contract amount to the following certified firms:
