### **CATS Purchase of Parts Organizer**

**Action:**

**Approve the purchase of a Kardex Remstar Shuttle XP from Alternative Handling Technologies in the amount of \$103,057.80.**

**Staff Resource(s):**

John Lewis, CATS  
Allen Smith III, CATS

**Explanation**

- A Kardex Remstar Shuttle XP is an automated piece of equipment used for warehousing and organizing parts and equipment.
- CATS was in need of this type of system in order to effectively store and organize equipment at the newly constructed North Brevard Yard Maintenance Facility which is part of the Blue Line Extension Project.
- Storage space at this facility is very limited; therefore a specialized storage system was necessary to maintain the maintenance equipment.
- This procurement was originally processed on December 16, 2016, for the total purchase price of \$99,991.
- Thereafter, additional shipping charges were added to the total cost which raised the price for this purchase over \$100,000.
- The total purchase, therefore, requires City Council approval based upon the total price of all goods and shipping costs exceeding \$100,000.

**Fiscal Note**

Funding: CATS Operating Budget
