Construct Vacuum Truck Receiving Station

Action:

Approve a contract in the amount of \$1,145,100 to the lowest responsive bidder Dellinger, Inc. for the construction of Zone 4 Facility Vacuum Truck Receiving Station.

Staff Resource(s):

Angela Lee, Charlotte Water
Ron Hargrove, Charlotte Water
Carl Wilson, Charlotte Water

Explanation

- This Project will construct a new receiving station used to dispose of materials collected by vacuum trucks, when cleaning out the sanitary sewer system. This system will be installed at the Zone 4 facility, located in Southwest Charlotte along West Tyvola Road (Council District 3).
- The Charlotte Water Field Operations Division currently operates four geographically-spaced centers, referred to as Zones, in order to reduce crew travel and response times.
- The new receiving station will improve employee safety and provide for additional capacity needed for operation support.
- On May 11, 2018, the City issued an Invitation to Bid; five bids were received.
- Dellinger, Inc. was selected as the lowest responsive, responsible bidder.
- The project is anticipated to be complete by the first quarter of 2019.

Charlotte Business INclusion

Established MSBE Goal: 5.00%

Committed MSBE Goal: 7.82%

Dellinger, Inc. met the established subcontracting goal and committed 7.82% (\$89,596) of the total contract amount to the following certified firms (Part B: Section 3 of the Charlotte Business INclusion Policy):

- Page Power Systems, Inc. (SBE) (\$53,951) (electrical)
- Maybury Fencing Inc. (SBE) (\$24,764) (fencing)
- Martin Resources, LLC (SBE) (\$9,300) (hauling)
- P&TL, Inc. (SBE) (\$1,581) (temporary silt fence)

Fiscal Note
