File #: 15-9098, Version: 1

Fats, Oil, and Grease Tracking Application

Action:

- A. Approve a three-year contract with Swift Comply to provide and implement a fats, oil, and grease tracking application,**
- B. Authorize the City Manager to approve price adjustments and amend the contract consistent with the purpose for which the contract was approved, and**
- C. Authorize the City Manager to purchase such additional software licenses, services, hardware, maintenance, and support as required to maintain the system for as long as the City uses the system.**

Staff Resource(s):

Angela Lee, Charlotte Water
David Czerr, Charlotte Water

Explanation

- The buildup of fats, oils, and grease (FOG) can cause sanitary sewer overflows.
- Sanitary sewer overflows are when untreated wastewater is discharged from the sanitary sewer system into the environment prior to reaching a treatment plant.
- Charlotte Water monitors and inspects over 5,000 restaurants per year to reduce commercial contributions of FOG into the sanitary sewer system.
- The FOG application will catalog and track compliance of restaurants with the City's Sewer Use Ordinance.
- On June 29, 2018, the City issued a Request for Proposals (RFP); two proposals were received.
- Swift Comply best meets the City's needs in terms of qualifications, experience, cost, and responsiveness to the RFP requirements.
- Expenditures for licensing and implementing the system are estimated to be \$140,000.
- Annual expenditures for maintenance and support are estimated to be \$24,300.

Charlotte Business INclusion

No subcontracting goals were established because there are no opportunities (Part C: Section 2.1(a) of the Charlotte Business INclusion Policy).
